Participants of the expedition TAURUS 2014:

Standing: Lucie Sýkorová, Jakub Vostřál, Ondřej Dufek, Martin Hota, Jan Voráček, Hakan Egilmez, Roman Hota, Gülsen Küçükali
Sitting: Evžen Janoušek, Berk Üstün, Ondřej Jäger, Pavel Schmidt, Helena Vysoká

In this calendar you will find panorama photos which I took during expedition TAURUS 2014 to the beautiful Turkish cave ALTINBESIK. This is a unique way of visualization of the cave environment. The basis is creating a 360 degrees virtual tour and its consequent transformation into 2D for printing. To obtain one such image I had to take a minimum of 20 high quality shots from one spot and then combine them using a special software. During the shoot I utilized several assistants operating radio fired flashes.

We conduct long term investigation in the Altinbesik Cave. Thanks to our investigation the cave and its surrounds were declared a National Park. Our cave divers discovered many kilometers of new passages, when we first came to the cave it was only hundreds meters long, now the total known passages exceed 4,2 kilometers. Our Czech speleo club GEOSPELEOS from Prague cooperates with the speleo club ASPEG from Istanbul.
